

### FOSSILS WALLS COLLECTION

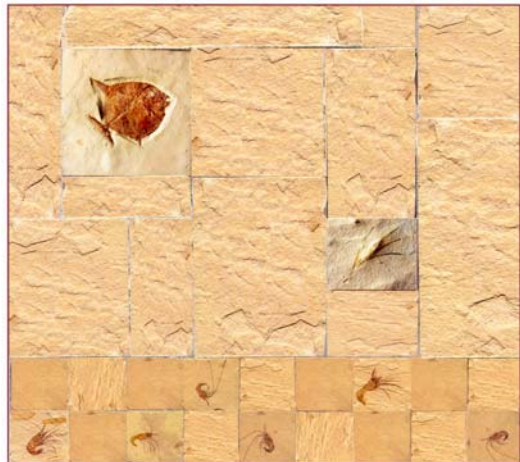

*Fossils are products of Nature, sometimes well preserved in calcareous-marly stones, found in many part of the World.*

*For the first time in the International Market the opportunity to have Natural FOSSILS WALLS, made by real Fossils*

## A NEW PRODUCT FOR TOP CLASS INTERIOR DECORATIONS

Under particular chemical-physical conditions ancient remains of animals and plants can be perfectly preserved and found after millions of years, within calcareous-marly stones.

Very few specialists have the skill and capacity to reveal what the stones can hold inside and to preserve and extract it after millions of years.

Most of the findings are destined to scientific studies, to allow the understanding of the ancient life on the Earth and to trace the natural evolution line.

Sometimes, in particular rich fossiliferous sites (very few in the world), we have the chance to get precious fossils samples to make them available for a restrict number of clients in the international market.

From these premises borns *Rock Planet Precious*, a series of particular proposals rare and exclusive, for exigent clients .

*Rock Planet S.r.l.*
